

Home Automation

Let J Baker Electric automate your home lighting, HVAC and more!

We provide lighting control that not only provides a sense of comfort and security, but also provides energy savings and peace of mind. Our system can control window blinds, home theater drapes, HVAC set back units and gated access. Security systems can interface with the home automation system to flash lights as a means of getting your neighbor's attention.

J Baker Electric is the East Tennessee distributor of Lite Touch equipment. Lite Touch is the oldest home automation system in America and includes a lifetime warranty. We will work with your preferred electrician to provide, install, and program the system. We also offer turnkey installations.
